Love this game, but wish development would go a bit faster :(Love this game, but wish development would go a bit faster :(If you are perchance noble sumerian you are at the right place. This game have sacrifice, goats, bread and pots. You name it and it's here. Please the god, rule the people and screw rest of the elite. It's heaven really. On the other hand we modern humans may find it confusing at first. But it's fun to jump around. Probably even more so with three other just as clueless contemporaries. Game runs well and controls are ok. Minor annoyance is the inability to skip some parts (e.g. score animation). Imagine crack addict that have to wait for long elevator music score to stop so that he can get high again. Truly unpleasant thing but could be solved easily, for example skip cutscenes if all human players hold action button. Btw some guy on reddit is claiming that his 5yo kid is really good player. Either both of them don't know how to play or I am on the lower side of the intelligence spectrum but this game is certainly not easy.. If you are perchance noble sumerian you are at the right place.
